

# Certified Quality Management System

As of December 2021, our 13 domestic sites and 19 overseas production subsidiaries established a quality management system with IATF16949 certification. By conducting reviews for certification regularly, we check the progress of our quality management and make necessary improvements.

Classification		Target	IATF16949 certified	Percentage
Domestic	Production plants/bases <sup>1)</sup>	13	13	100%
Overseas	Production companies <sup>3)</sup>	19	18	95%
Total		32	31	97%

※ New/address relocation bases are excluded from the target base due to the process of acquiring certification after 1 year of mass production.
